

## QUALITY AND ENVIRONMENT POLICY

« Since 2006, ODDO BHF METALS, a department of ODDO BHF SCA, has been a partner of producers and European processors in the supply of non-ferrous metals (aluminum, copper, tin and zinc).

In a world where the challenges of sustainable development have become a priority and in particular our priority, our industrial partners are asking us more and more about CSR (Corporate Social Responsibility) issues.

Already in 2014, our involvement led to a CSR assessment via the Ecovadis platform and, in 2015, to a double a double ISO 9001 and 14001 certification (respectively quality and environment).

ODDO BHF METALS places its producer and processor partners at the center of its strategic objectives. We owe them listening, satisfaction, guarantee of efficiency and respect for our commitments in the context of our services. The double certification is the demonstration of our willingness to continuously improve our organization, and we are committed to:

- satisfying and retaining our customers, while respecting regulatory requirements and other applicable requirements,
- continuously improving our performance, while limiting our impact on the environment as much as possible,
- promoting the consideration of societal and environmental issues with our suppliers and service providers.

Our major short-term challenges will consist in:

- ensure our economic sustainability in a complicated geopolitical and health context, with high market price volatility and increased logistics costs,
- securing our customers' supply chains both in terms of supplies and the logistics service provided,
- review our performance indicators to improve efficiency.

As Managing Director of ODDO BHF METALS, I ask all of my collaborators to contribute to this project. I provide the necessary resources for the maintenance of the system and appoint Ms. Desbonnets and Mr. Gay to the quality and environment department to ensure its proper functioning. »
