ODDO BHF ACTIVE ETF
*Efficient by nature,
active by conviction*

JANUARY 2026

MARKETING INFORMATION

WHAT ARE ACTIVE ETFs?

Why are they appealing?

WHAT IS AN ETF?

An exchange-traded fund (ETF) is a **fund that trades on a stock exchange**, similar to an individual stock. ETFs can be bought and sold throughout the trading day at market prices.

Until now, most ETFs have used passive strategies, but this is changing. **In fact, a variety of investment strategies** can be placed into the ETF structure to leverage its benefits, **not just passive ones. The ETF itself is just a wrapper, and the strategy is independent from the vehicle.**

... AND AN ACTIVE ETF?

As the name implies, active ETFs are **actively managed by professional fund managers** who make investment decisions on an ongoing basis. This management style enables them to adjust the portfolio in response to perceived market opportunities, risks, research, with the goal of achieving **superior returns and outperforming a benchmark** index over the long term.

HOW DID THEY EVOLVE AND WHAT DO INVESTORS LIKE ABOUT THEM?

Since their introduction in the U.S. in the mid-2000s and later arrival in Europe, active ETFs have steadily gained ground — supported by **regulatory advancements, improved transparency, and growing investor appetite for flexible investment tools, according to us.** While initially met with caution, these vehicles have evolved significantly, with increasing numbers of asset managers launching strategies that **combine the benefits of active management with the efficiency of the ETF wrapper.**

They offer the **potential for outperformance in an accessible format—traded intraday, often with lower fees and greater portfolio transparency.** For investors, **active ETFs can serve multiple roles within an allocation:** as core holdings with an active tilt, as satellite strategies for specific themes or market segments, or as tactical tools to respond swiftly to changing market conditions.

NICOLAS CHAPUT
Global CEO

By blending precision, agility, and active approach, active ETFs are reshaping portfolio construction—offering a new avenue to generate value in today's dynamic investment landscape.

24%

of professional investors in Europe and Asia already use active ETFs

28%

of ETF AuM in Europe will be actively managed by 2030

94%

of wealth managers across Europe are planning to increase their use of active ETFs in 2025

ACTIVE ETFS

A growing force in Europe

ALTHOUGH THEY ARE STILL MUCH MORE ESTABLISHED IN THE US, ETFS ARE RAPIDLY GAINING MOMENTUM IN EUROPE

Globally there are USD 1,100 billion in assets under management in active ETFs which account for 7% of total ETF AuM worldwide.

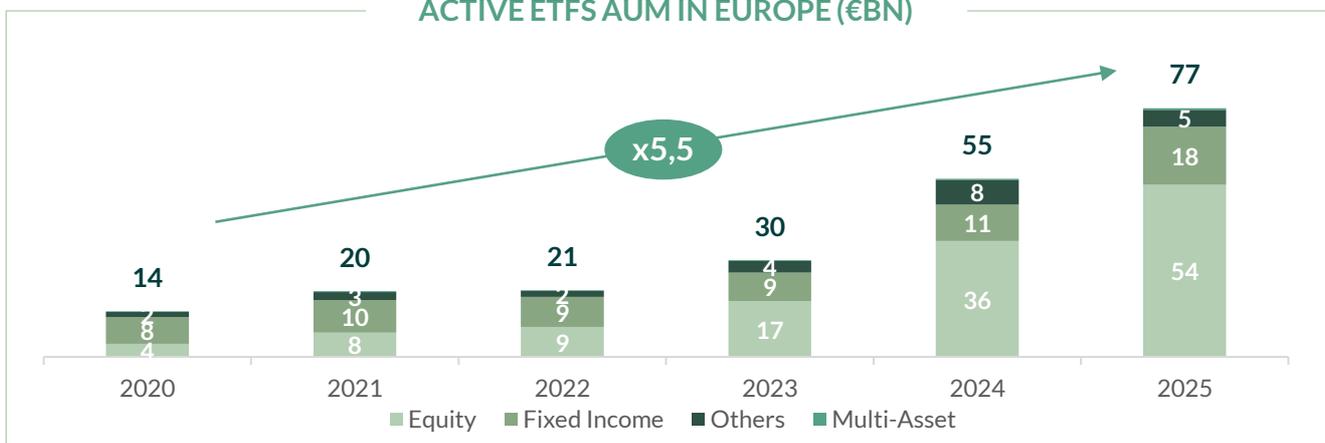

The majority of assets in active ETFs are held in funds launched in the US. These manage more than USD 800 billion and account for 8% of the total US ETF market.

In Europe, active ETFs only make up 3% of the ETF market. So are active ETFs gaining traction only in the United States? We firmly believe the trend extends well beyond.

In Europe, active ETFs are now one of the fastest-growing segments, appealing to both institutional and retail investors. According to Morningstar, active ETF market in Europe grew from €30 billion in 2023 to close to €55 billion at the end of 2024 and is expected to reach over \$1 trillion by 2030.

ACTIVE MANAGEMENT OR ETFs?

Active ETFs: the combination of both

OUTPERFORMANCE POTENTIAL

Actively managed ETFs are based on **in-depth research**, leveraging on the **skills of portfolio managers** with the objective of **outperforming the market** and **generating alpha over the long run** for their clients.

RISK MANAGEMENT

Active strategies are able to **react quickly** to market changes and help **manage risks** more effectively.

UNCONSTRAINED

While passive funds just follow an index, active strategies are **more flexible**, allowing for avoiding overexposure to certain sectors or stocks.

ESG

Active managers can **align their portfolios more closely with ESG objectives** by selecting investments that meet specific sustainability criteria, without the constraints imposed by index replication.

TRANSPARENCY

Active ETF holdings are usually **published daily** on the provider's website, allowing investors to know their exposure at any time.

ACCESSIBILITY

ETFs are listed on stock exchanges like stocks and, in some cases, **do not require a minimum investment amount**.

COST EFFICIENCY

Active ETFs are designed to trade at prices that **closely match the actual value** of the fund's holdings. They also typically have low management fees.

FLEXIBILITY

Active ETFs are **traded on stock exchanges during market hours**. Investors **can buy or sell at any time** throughout the trading day.

Active ETFs may be subject to the following risks, among others: Secondary market risk, concentration risk, emerging market risk, currency risk, risk related to ETF classes and non-ETF classes, environmental, social and governance standards, risk related to the classification of SFDR sub-funds, risk related to filtering, investment liquidity, small and mid-cap risk, political and/or legal/regulatory risk, regulatory restrictions and issuer-specific risk.

ODDO BHF ACTIVE ETFS

“Efficient by nature, active by conviction”

EFFICIENT BY NATURE...

With our new Active ETF offering, we are **extending our proven expertise** in asset allocation, equities, and sustainable investing to **a format that combines agility and efficiency**. These **strategies are carefully selected to align with the ETF structure and complement our existing fund range**. We believe in **giving investors the choice**. Our Active ETFs are designed to **offer the flexibility of a listed vehicle without compromising on the potential for alpha generation**. Whether clients seek diversification, transparency, or liquidity, our Active ETF range delivers — all while staying true to our active management roots.

...ACTIVE BY CONVICTION

Our investment style at ODDO BHF AM is characterized by an **active** and **long-term investment approach**. We aim to **outperform the markets** in order to **create long-term value for our clients**. To do so, we place both financial and extra-financial analysis* at the core of our strategies. Our experienced and stable management teams, combined with transparent and disciplined processes, define who we are. Today, we manage over **€63 billion in actively managed strategies**, across a wide range of asset classes.

EFFICIENCY COMBINED WITH CONVICTION IN EVERY MOVE

At ODDO BHF AM, we don't just follow the market — we seek to understand it better. At our core, we believe **performance is built - not tracked**. Our Active UCITS ETF range merges **high-conviction investing with the structural benefits of ETFs**, offering investors a powerful new way to access active management. Built to stay ahead.

At ODDO BHF AM, being active isn't just something we do. It's who we are. Active management has been embedded in our DNA since day one.

NICOLAS CHAPUT

¹ The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider. | ² The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. It scales in a range from 1 (lowest risk) to 7 (highest risk). The lowest category does not mean a risk-free investment. This indicator is not constant and is updated if the risk profile of the fund changes over time. Historical data, such as is used to calculate the risk indicator, may not be a reliable indication of the future risk profile of the Fund. There is no guarantee that the management objectives in terms of risk will actually be met. The risk indicator assumes you keep the product until the end of the recommended holding period. The actual risk can vary ! significantly if you cash in at an early stage and you may get back less. | Source: ODDO BHF AM SAS | Data as of 13/01/2026

ODDO BHF US Equity Active UCITS ETF

Our active approach TO INVESTING EFFICIENTLY IN US EQUITIES

- 1 The fund invests in **US equities** based on a proprietary **quantitative approach**. The quantitative model rates equities based on a **smart momentum strategy** analysing extensive historical data to **detect stable trends** in the market.
- 2 The rule-based investment process constitutes a **cost-efficient way** to benefit from ODDO BHF AM's proven stock-picking expertise in the **US equity market**.
- 3 **Exploitation of stable market trends:** A diversified and risk-controlled approach to investing in different market trends with the objective of achieving long-term outperformance over various market cycles
- 4 **Around 20 years of experience** with the same strategy in dedicated mandates, passing through various market cycles. The founders of the quantitative model in 2000 still manage the strategy today.
