### 1. Regulatory framework

Since January 1, 2014, the CRD4 Directive and Regulation (EU) no. 575/2013 of the European Parliament and Council of June 26, 2013 (CRR), amended by Regulation no. 876/2019, applicable with immediate effect, has introduced Basel III regulations in Europe. The CRD4 Directive was transposed into French law by the Ministerial Order of November 3, 2014.

The application of Part 8 of the CRR translates for the ODDO BHF group into the disclosure of information contingent to minimum requirements of own funds ("Pillar 1") and the supervisory review and evaluation process ("Pillar 2").

The ODDO BHF group was exempted by ACPR from the application of supervisory requirements on an individual basis, in the conditions laid out in article 7 of the CRR. The set of information disclosed in the following section is based exclusively on the prudential scope of consolidation. In application of article 19 of the CRR, as of December 31, 2023, the prudential scope of consolidation is the same as the accounting scope of consolidation.

### 2. Composition of regulatory capital

Regulatory capital, which is calculated based on shareholders' equity, comprises three categories, as described below. Each category comprises liability items (capital and debt instruments) extracted from the consolidated financial statements, to which regulatory adjustments have been made.

Since January 1<sup>st</sup>, 2018, the Group no longer applies transitional arrangements in the determination of the regulatory capital, previously allowed under the CRR.

#### Common Equity Tier 1 (CET1)

CET1 is calculated as follows:

- the Group's consolidated own funds,
- interim net profits for the Group, under the authorization granted by ACPR to allow the institution to anticipate its inclusion into regulatory capital,
- accumulated other comprehensive income, including gains and losses on available-for-sale financial assets,
- minority interests if any, which are partially derecognised.

Deductions from this calculation base include the following items:

- treasury shares held and valued at their net carrying value,
- intangible assets, including start-up costs and goodwill,
- deferred tax assets and investments in financial-sector entities related to this category (mainly CET 1 instruments),
- a correction to assets and liabilities stated at their fair value as part of the prudent valuation approach (Article 105 CRR).

#### Additional Tier 1 capital (AT1)

AT1 capital comprises perpetual debt instruments without any redemption incentive or obligation (in particular step-up features).

Investments in financial-sector entities related to this category are deducted from additional Tier 1 capital.

#### Tier 2 (T2) capital

Tier 2 capital comprises:

- subordinated debt instruments, which must have a minimum maturity of five years. They must not carry any early repayment incentives. These instruments are subject to a haircut during the five-year period prior to their maturity date.

Investments in financial-sector entities related to this category (predominantly subordinated debt instruments).

### 3. Capital adequacy

The ODDO BHF group defines risk appetite as the level of risk that the ODDO BHF group is prepared to incur given its strategic targets which are:

- Maintain its financial resilience and respect risk appetite limits.
- Protect its financial flexibility to allow for organic and external growths.
- Allocate in an appropriate manner the capital between different business lines.
- Maintain the Group's resilience in case of stress.
- Meet stakeholders' requests: supervisory authorities, debt investors, ratings agencies and shareholders.

As a consequence, the ODDO BHF group defines a capital target which is built considering internal factors (target rating, risk profile and group strategy) as well as external factors (minimum own funds requirements).

Meeting this target is ensured by sound financial planning: which aims at matching resources with the Group's capital requirements and at simulating the impact on regulatory capital of operations identified in the budgeting process and in strategic Group planning.
