

# RITRANSPARENCY REPORT 2019

# **ODDO BHF Asset Management**

# About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the <a href="PRI website">PRI website</a>, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

# PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

# Usage restrictions

Public Transparency Reports are the intellectual property of PRI. In no case, can this report or any content of it be sold to other parties.

Third party organisations who have accessed Transparency reports outside of the Data Portal and intend to use those require the prior written consent of PRI (other than for internal use or research or for the sole benefit of the organisation whose report this refers to).

## SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

In addition to traditional financial analysis, ODDO BHF Asset Management ensures that ESG criteria that are significant for investors are taken into consideration in researching and evaluating issuers, just like traditional financial criteria.

Our in-house ESG research platform, which is available to all investment teams, has allowed us to roll out our ESG integration policy, whose primary goal is to influence the construction of investment portfolios. We thereby address our dual objective of producing the fullest and most holistic possible

analysis of long-term risks and opportunities and of offering our clients sustainable financial performance.

# Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

ODDO BHF AM commitment to the integration of ESG criteria is rooted in the long-term focus of its business as the management subsidiary of an independent bank with origins dating back to 1849 and a stable and long-term shareholding structure: 60% for the Oddo family, 30% for employees, 10% for other investors as of 31 December 2018. The Principles for Responsible Investment are consistent with our vision of asset management, which is based on fundamental analysis and a long-term investment horizon, in the aim of better identifying risks and opportunities. During the investment phase, ODDO BHF AM aims gradually to integrate ESG criteria into its analysis and the construction of its portfolios. Upstream and downstream of the investment phase, ODDO BHF AM plays its role as an active investor by voting at shareholder meetings and promoting dialogue/engagement. Based on the recommendations of the PRI, ODDO BHF AM is gradually implementing its ESG integration approach in all asset classes. In descending order of priority for ODDO BHF AM the European equities asset class, the European corporate bond asset class, the sovereign debt asset class, together totaling above 70% of total undertakings for collective investment in transferable securities managed by the management company as of end-2018. ODDO BHF AM does not apply any sector or thematic exclusion policies in the management of open-ended funds, with the exception of companies involved in anti-personnel mines (within the scope of the Ottawa Treaty, 1997) and cluster munitions (Oslo Convention, 2008). ODDO BHF AM uses the integrated ESG methodology developed internally, which breaks down into 10 themes: 3 ENVIRONMENTAL themes: Environmental Management Systems (EMS), Environmental Opportunities, Environmental Risks, 4 SOCIAL themes: Regulation, Quality of management/Human Capital, Licence to Operate/Reputation/Controversies, Social Ecosystem (customer satisfaction, supply chain management, innovation, quality of products and services), 3 GOVERNANCE themes: Sustainab

ODDO BHF AM has opted to prioritise Governance and Human Capital/Management Quality criteria. The 10 themes cover the 10 principles of the United Nations Global Compact (signed by ODDO BHF in 2015) which derive from the following instruments: Universal Declaration of Human Rights, International Labour Organization Declaration on Fundamental Principles and Rights at Work, Rio Declaration on Environment and Development, United Nations Convention against Corruption. Sector-specific characteristics: ODDO BHF AM reviews cross-cutting ESG criteria, such as corporate governance and quality of management (including human resources), for all sectors analysed. However, its approach is primarily bottom-up, and ODDO BHF AM seeks to identify long-term ESG investment trends in all sectors (risks and opportunities alike), the specific ESG characteristics of growth models in each sector, and specific ESG criteria and indicators. ODDO BHF AM currently uses the same ESG analysis model for the equity and corporate bond asset classes. Convertible bonds are included within this scope.

9

ODDO BHF AM is developping a proprietary database that assigns a synthetic ESG rating in the form of a score and a five-level rating, on a "best-in-universe" basis: Strong opportunity (5), Opportunity (4), Neutral (3), Moderate risk (2), High risk (1). In this absolut best-in-universe approach, issuers with a Strong opportunity (5) rating deliver the best ESG practices, while those with a High risk (1) rating are poor performers in ESG terms. The ESG rating is also combined with an ESG trend (neutral, positive or negative), allowing us to qualify best-effort momentum. At ODDO BHF AM, the global weightings of the 3 pillars E, S, and G remains sector-based. ODDO BHF AM uses the following service providers specialising in ESG analysis: the ESG specialised teams of selected brokers, external extra-financial data providers (Sustainalytics, CDP), raw ESG data increasingly provided by Bloomberg and Facset.

ODDO BHF AM commits to a 3-year ESG roadmap with the objective to extend the ESG integration process to other expertise like Quantitative equity, Credit High Yield, Private Equity and Private Debt.

O No

SG 01 CC Voluntary Descriptive General

SG 01.6 CC

Indicate the climate-related risks and opportunities that have been identified and factored into the investment strategies and products, within the organisation's investment time horizon.

ODDO BHF Group has been a signatory of the Carbon Disclosure Project (CDP) since 2006 and of the United Nations Global Compact since 2015. Climate issues have thus been on the group's radar for several years.

ODDO BHF Asset Management is part of this search for continuous progress and now incorporates a qualitative analysis that goes beyond carbon measurement and looks at how its ESG-integrating funds contribute to the achievement of climate objectives (The Paris Agreement main objective is to contain global warming below 2°C by 2100).

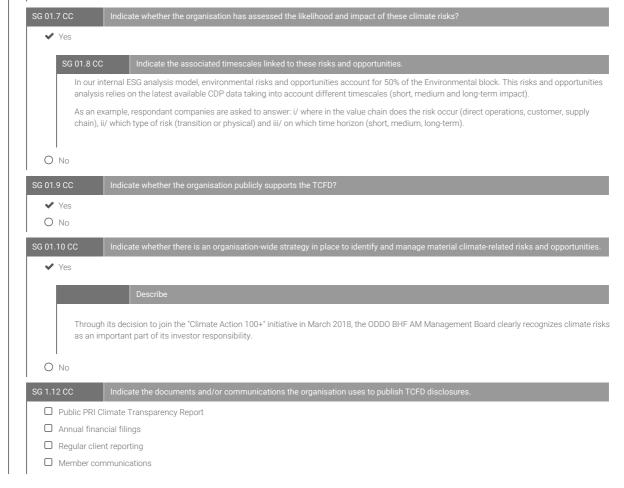

As part of the implementation of Article 173 of the Energy Transition and Green Growth Act in France, and more specifically the integration of climate change risks into investment decisions, ODDO BHF Asset Management has built its environmental strategy around three axes: i/a quantitative measurement of carbon intensity of its main equity funds, ii/ the inclusion of environmental themes in its shareholder dialogue policy with companies, and iii/a qualitative measurement of its investment strategies' contribution to the transition towards a low carbon economy.

ODDO BHF Asset Management has opted to work on the carbon intensity of its portfolios, i.e. CO2 emissions relative to turnover (while the carbon footprint brings CO2 emissions to market capitalization). This is an indicator less volatile and more reflective of the effectiveness of corporate actions.

To support its commitment to climate change issues, ODDO BHF AM became a signatory of the Climate Action 100+ initiative in March 2018. By joining the list of signatories, the objective for ODDO BHF AM is to participate in the joint effort of investors to facilitate the dialogue with the 100 companies that are the word's largest emitters of greenhouse gases.

Finally, ODDO BHF AM has developed a specific indicator to measure each company's contribution to the transition towards a low carbon economy. This ETA (Energy Transition Analysis) indicator is composed of two aspects: i/ the positioning of the sector in which the company operates, accounting for 30% and ii/ the score of the company specific environment block assigned by our ESG model, accounting for 70%. The sectoral positioning takes into account the long-term environmental risks and opportunities using ODDO BHF AM's SDG matrix based on the "2030 United Nations Sustainable Development Goals". Within this matrix, ODDO BHF AM identifies five environmental themes: Clean Energies (SDGs 7, 13), Energy Efficiency (SDGs 7, 9, 11), Biodiversity (SDGs 6, 12, 14, 15), Circular Economy (SDGs 11, 12) and Sustainable Mobility (SDGs 9, 11, 13). The second part, the environment block of ODDO BHF AM's ESG analysis model, is divided into two parts: the environmental management system of the company analysed and the analysis of environmental opportunities and risks related to the business activity (products and services).

Beyond identifying environmental impact, the goal is also to highlight potential mid to long-term drivers of value creation or destruction for companies.

|  | specify  We published in December 2017 a dedicated white paper regarding our approach to climate change, explaining our analysis methodology.   |

|         | _             |  |
|         |               | Describe   |
|         |               | ODDO BHF AM has developed a specific indicator to measure each company's contribution to the transition towards a low carbon economy. This   |
|         | - 1           | ETA (Energy Transition Analysis) indicator is composed of two aspects: i/ the positioning of the sector in which the company operates, accounting for 30% and ii/ the score of the company specific environment block assigned by our ESG model, accounting for 70%  |
|         |               | for 30% and ii/ the score of the company specific environment block assigned by our ESG model, accounting for 70%.   |
|         | - 1           | The sectoral positioning takes into account the long-term environmental risks and opportunities using ODDO BHF AM's SDG matrix based on the "2030 United Nations Sustainable Development Goals". Within this matrix, ODDO BHF AM identifies five environmental themes: Clean Energies (SDGs  |
|         | - 1           | 7, 13), Energy Efficiency (SDGs 7, 9, 11), Biodiversity (SDGs 6, 12, 14, 15), Circular Economy (SDGs 11, 12) and Sustainable Mobility (SDGs 9, 11, 13).  |
|         |               | The second part, the environment block of ODDO BHF AM's ESG analysis model, is divided into two parts: the environmental management system of  |
|         | - 1           | the company analysed and the analysis of environmental opportunities and risks related to the business activity (products and services).   |
|         | - 1           | Environmental risks and opportunities account for 50% of the Environmental block. This risks and opportunities analysis relies on the latest available   |
|         |               | CDP data taking into account different timescales (short, medium and long-term impact), being aligned with the TCFD recommendations.   |

companies.

Beyond identifying environmental impact, the goal is also to highlight potential mid to long-term drivers of value creation or destruction for

By aggregating the ETA scores of the companies held in a portfolio (weighted by the weight of each position), ODDO BHF AM come up with an indicator of the contribution of such an investment portfolio to the transition towards a low carbon economy. This methodology provides ODDO BHF AM with a qualitative approach, helping it to align its portfolios with climate scenarios. ☑ Inform active ownership As part of our dialogue and engagement policy, climate-related issues have become an impoortant part of the discussions that we have with companies, during individual dialogue as well as during collaborative engagement actions through the Climate Action 100+ initiative. ODDO BHF AM publishes an annual dialogue & engagement report available on its website. ☐ Other ■ Board members, trustees, C-level roles, Investment Committee ☑ Portfolio managers Dedicated responsible investment staff External managers ☐ Investment consultants/actuaries ☐ Other O Yes **✓** No Climate-related analysis is a recent practice back to 2017 in our organisation and we intend to proceed step by step in order not to distort our longterm positive financial track-records. ✓ Yes, including analysis based on a 2°C or lower scenario O Yes, not including analysis based on a 2°C or lower scenario O No, a range is not used Provider Scenario used IFA IEA IEA IEA IFΑ IRFNA Greenpeace Institute for Sustainable Development Bloomberg IPCC Representative Concentration Pathway (RCP) 8.5 IPCC ☑ RPC 6 **☑** RPC 4.5 IPCC IPCC **☑** RPC 2.6 Other Other Other Some investment risks and opportunities arise as a result of long term trends. O Process for climate-related risks is integrated into overall risk management

Please describe

Climate-related risks analysis is at this stage to inform and to raise awareness of the portfolio managers. For some dedicated mandate, we are able to take it into consideration to answer specific client requirements.

### LEA 01.6 Additional information [optional]

ODDO BHF Asset Management believes that exercising voting rights is an integral part of its responsibility as a shareholder. We regard our profession as investment managers from the point of view of investors and therefore believe that participating in annual general meetings (AGMs) is in the interests of our fund unitholders. Participating in AGMs helps us ensure that entrepreneurs' strategies, risk management and governance are creating value over the long term, which is a source of returns for their shareholders.

Moreover, ODDO BHF AM has set up a formal Dialogue & Engagement policy in 2017 which is under responsability of the quarterly ESG Integration Committee. The Committee is composed of the Head of ESG Research, the CIO, portfolio managers, and the Compliance Officer. The aim is to review the companies with a low ESG rating in which ODDO BHF AM SAS is invested in, and to decide which ones we will engage in the next 3 months. The Committee takes its decisions with the support of informations from the internal ESG platform and from the database of our proxy provider (ISS). A monitoring process is in place and the result of each engagement action is communicated to PM teams.

More generally, dialogue & engagement at ODDO BHF AM is easy in practice as porfolio managers meet often top managements of the companies in which they are invested or not.

|----------|-------------------------|------------|

Our engagement approach is based on identifying and systematically formalising the vectors of progress that are expected. This allows us to assess the results and to follow up on them. Our approach is deemed a success if dialogue with an issuer has led to greater ESG transparency and/or an improvement in its ESG practices within 18 to 24 months. If the engagement is unsuccessful (i.e., if there is no dialogue or if the dialogue that has been carried out is unsatisfactory), the management teams may decide to exclude the issuer from the investment universe or, in the case of an active position, to sell it off.

### FI 04.2 Describe your approach to screening for internally managed active fixed income

ODDO BHF AM is implementing its ESG integration approach in corporate bonds and sovereign debt asset classes. In addition to companies involved in anti-personnel mines and cluster munitions, it now applies negative screenings to exclude issuers suffering from the highest level of controversy.

The ESG methodology to access the equity and debt of a corporate is the same. ODDO BHF AM uses an integrated ESG methodology which breaks down into 10 themes: 3 ENVIRONMENTAL themes: Environmental Management Systems (EMS), Environmental Opportunities, Environmental Risks; 4 SOCIAL themes: Regulation, Human Capital, Licence to Operate, Social Ecosystem; 3 GOVERNANCE themes: Sustainable Development Strategy, Corporate Governance, Business Ethics. The 10 themes cover the 10 principles of the United Nations Global Compact which derive from the Universal Declaration of Human Rights, the International Labour Organization Declaration on Fundamental Principles and Rights at Work, the Rio Declaration on Environment and Development and the United Nations Convention against Corruption.

FI 10.1 Describe your approach to integrating ESG into traditional financial analysis.

ODDO BHF AM is implementing its ESG integration approach in corporate bonds and sovereign debt asset classes. The ESG methodology to access the equity and debt of a corporate is the same. ODDO BHF AM uses an integrated ESG methodology which breaks down into 10 themes: 3 ENVIRONMENTAL themes: Environmental Management Systems (EMS), Environmental Opportunities, Environmental Risks; 4 SOCIAL themes: Regulation, Human Capital, Licence to Operate, Social Ecosystem; 3 GOVERNANCE themes: Sustainable Development Strategy, Corporate Governance, Business Ethics. The 10 themes cover the 10 principles of the United Nations Global Compact which derive from the Universal Declaration of Human Rights, the International Labour

Organization Declaration on Fundamental Principles and Rights at Work, the Rio Declaration on Environment and Development and the United Nations
Convention against Corruption. ODDO BHF AM use a specific ESG methodology for the sovereign debt asset classes. This research has been developed by
the internal broker ODDO BHF Corporate & Markets for OECD and emerging countries. This specific research is updated on a bi-annual frequency. To ensure
that ESG integration is based on a robust analysis: - Comprehensive ESG research is undertaken or sourced to determine companies' activities and products,
- Company information and/or ratings on ESG are updated regularly, - A periodic review of the quality of the research undertaken or provided is carried out.

The Environment block first reviews companies' Environmental Management Systems (EMS), in order to gauge their degree of maturity and the progress they have made in recent years. We then undertake an analysis of environmental opportunities and/or risks based on the approach proposed by the TCFD. The analysis of opportunities deals with the products and/or services offered by the company while focusing on their environmental added value. The risk analysis takes up the distinction between transition risks (regulation, technological disruption, consumption modes, etc.) and physical risks (geographical exposure to natural disasters, global warming, rising oceans, etc.).

Within the Social block, human capital (quality of management / human resources) is a key factor in the proper execution of a company's long-term strategy and is, accordingly, a major pillar in our analysis model. Indeed, a manager's leadership, a management board cognitive diversity, innovation, and career management are all key challenges to which we pay special attention when we meet with companies. Likewise, taking an interest in the company's social ecosystem (brand value, client capital, technological capital, and supply chain) allows us to better determine the long-term hidden value of intangible assets.

Lastly, within the Governance block, we pay special attention to Corporate Governance, which is a very instructive of risk on a medium- or long-term investment horizon. To prevent analysis biases as much as possible, we make a distinction between companies based on their ownership structure (noncontrolled, controlled, and family-owned) and their size (large caps vs. mid & small caps). The theme of business ethics is determined for each company from the point of view of the track-record of incidents, tax transparency, and exposure to the risk of corruption (sector and geographical).

| FI 10.2 |   | Describe how your ESG integration approach is adapted to each of the different types of fixed income you invest in. |   |  |  |

### Corporate (financial)

ODDO BHF AM uses an integrated ESG methodology which breaks down into 10 themes: 3 ENVIRONMENTAL themes: Environmental Management Systems (EMS), Environmental Opportunities, Environmental Risks; 4 SOCIAL themes: Regulation, Human Capital, Licence to Operate, Social Ecosystem; 3 GOVERNANCE themes: Sustainable Development Strategy, Corporate Governance, Business Ethics. The 10 themes cover the 10 principles of the United Nations Global Compact which derive from the Universal Declaration of Human Rights, the International Labour Organization Declaration on Fundamental Principles and Rights at Work, the Rio Declaration on Environment and Development and the United Nations Convention against Corruntion.

The update of the ESG factors is carried out on a regular basis when the ESG research team and PMs meet the companies. By default, we review ESG rating of issuers at least every 18 to 24 months. The positive or negative development of a controversy is also likely to change the rating of a company at any time.

### Corporate (non-financial)
